\* Dolby noise reduction and HX Pro headroom extension manufactured under license from Dolby Laboratories Licensing Corporation. HX Pro originated by Bang and Olufsen. "DOLBY", the double-D symbol and "HX PRO" are trademarks of Dolby Laboratories Licensing Corporation.

- Please file and use this simplified manual together with the service manual for Model No. RS-BX707, Order No. AD9106170C2.
- This service manual indicates the main differences between Original RS-BX707.

## $lue{lue}$ CHANGE IN REPLACEMENT PARTS LIST (on pages 32, 38 $\sim$ 40, 42.)

Notes: • Mentioned in this parts list is only those different from Model No. RS-BX707 (EG).

All other parts are the same as for RS-BX707 (EG).

• Important safety notice:

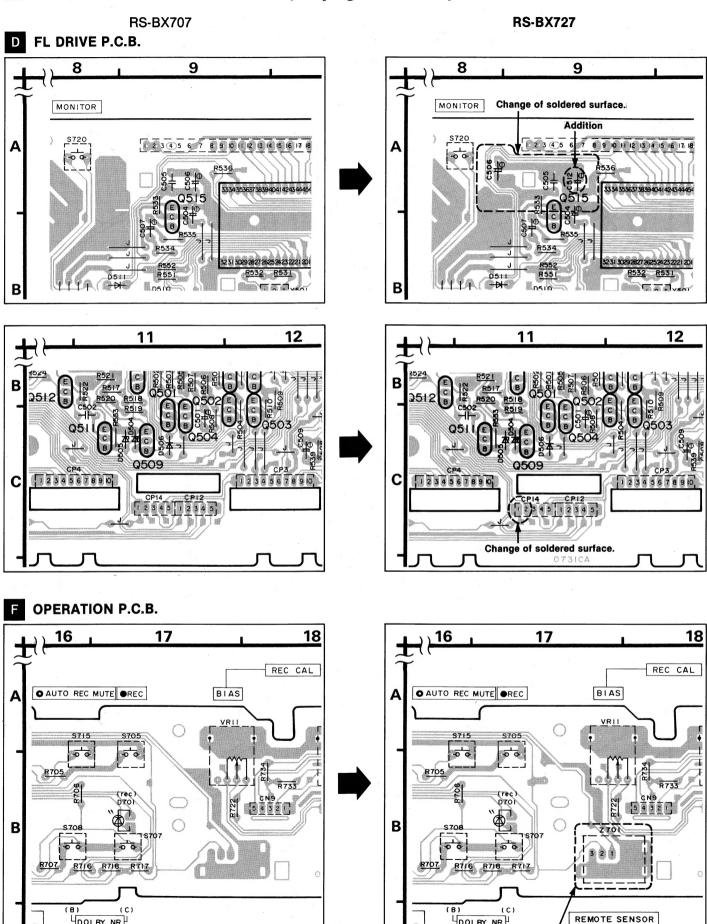

Components identified by  $\triangle$  mark have special characteristics important for safety. Furthemore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

#### CONNECTIONS

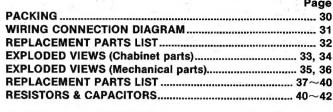

Make connections in the numbered sequence by using the included cables.

(1) Connect the stereo connection cables.

Stereo connection cable White (L) = Red (R) =

(2) Connect the AC power supply cord.

#### **\* TECHNICAL INFORMATION**

This technical information is located on pp 45-51 of the RS-B555 Service Manual (Order No. AD8907231C5).

Therefore, refer to that Service Manual.

There is a few diferences in this schematic diagram.

But this is the same as RS-B555 basically.

AC power supply cord (2)

The configuration of the AC outlet and AC power supply cord differs according to area.

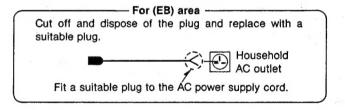

#### **Placement hints**

If this unit is placed near a receiver or a tuner, a "hum" noise may be heard during tape playback, recording, or AM reception of the receiver or the tuner.

If this occurs, leave as much space as possible between the units, or place them where is the least amount of "hum".

#### Note:

This unit is a precision instrument. Be sure to place it on a flat surface.

#### ACCESSORIES

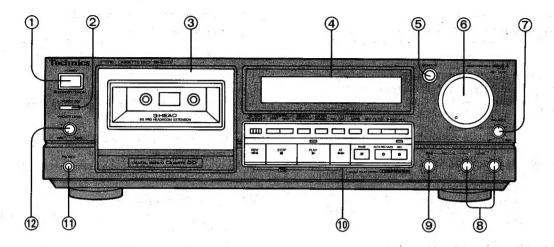

AC power supply cord [(SFDAC05E03).....(EG)] (SJA193).....(EB)]

..... 1 pc.

Note: Configuration of AC power supply cord differs according to area.

#### LOCATION OF CONTROLS

#### Control section I

1 Power "STANDBY & /ON" switch (POWER & STANDBY & = ON)

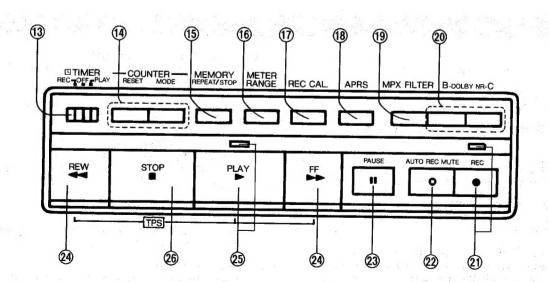

This switch switches ON and OFF the secondary circuit power only. The unit is in the "standby" condition when this switch is set to the STANDBY & position. Regardless of the switch setting, the primary circuit is always "live" as long as the power cord is connected to an electrical outlet.

- ② Open/close button ( OPEN/CLOSE)
  This button can be used to open or close the cassette holder.
- ③ Cassette holder
- 4 Indicators section (Refer to page 4.)
- (5) Monitor switch (MONITOR)

In order to monitor the tape (check the recording condition), the sound on the tape (immediately after recording) and the sound of the sound source (the original sound, before recording) can be alternately selected by pressing this button. (The corresponding indicator will illuminate.)

(6) Recording-level control (REC LEVEL) This control can be used to regulate the recording level.

- Recording-balance control (BALANCE)
  This control can be used to balance the left and right sound levels during recording.
- Calibration-level control (REC CAL LEVEL)
   The sensitivity differences (high or low recording levels) for each tape type can be corrected by using these controls.
- Calibration-bias control (REC CAL BIAS)
   The frequency response for each tape type can be equalized by using this control.
- (10) Operation section
  (Refer to "Control section II" on pages 3, 4.)
- (1) Headphones jack (PHONES)
- (PHONES LEVEL)

#### **Control section II**

#### (3) Timer switch (I TIMER)

This switch is used to automatically begin a tape recording or tape playback at a certain time, selected by a timer (not included).

#### (14) Counter buttons (COUNTER RESET, MODE)

RESET: This button can be used to reset the tape/linear

counter indication to "000\_/00.00".

MODE: This button can be used to select the tape/linear

counter indication.

#### (5) Memory-mode button (MEMORY REPEAT/STOP)

REPEAT: This button can be used to set this unit to the

"A-B repeat" mode.

STOP: This button can be used to rewind the tape to the

preset "000\_/00.00" point when the rewind (◄◄) button is pressed.

#### (f) Meter-range selector (METER RANGE)

This selector can be used to select the meter-range display of the input level meter.

#### (7) Calibration selector (REC CAL)

This selector can switch the input level display between the level adjustment indicator and bias adjustment indicator.

#### (18) APRS button (APRS)

This button can be used to hold the peak level while monitoring the input sound.

#### (19) Multiplex filter switch (MPX FILTER)

This prevents the Dolby NR circuit from operating in error when FM stereo broadcasts are recorded using the noise reduction function.

#### ② Dolby noise-reduction buttons (B-DOLBY NR-C)

These buttons can be used to reduce the hiss noise that is characteristic of tape. This unit is provided with both the Dolby B type and C type noise-reduction systems.

#### 21 Record button and indicator ( REC)

This button can be used to change the tape deck to the recording stand-by mode.

## ② Automatic-record-muting button ( AUTO REC MUTE)

This button can be used to make a silent interval on the tape being recorded on tape deck.

#### ② Pause button (II PAUSE)

This button can be used to temporarily stop the tape playback or recording of tape deck.

#### ②4 Rewind/fast-forward/search buttons (◄◄ REW, ▶► FF, TPS)

These buttons can be used to fast forward or rewind the tape, or to easily search for the tune's beginning of the tape quickly.

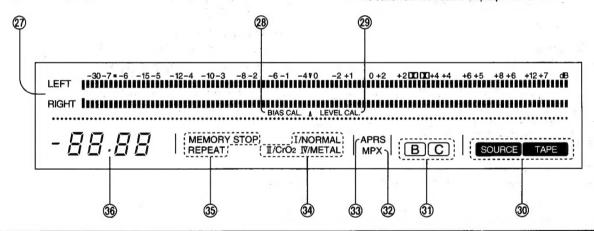

#### 25 Playback button and indicator (▶ PLAY)

This button can be used to start the playback or recording of the cassette.

(The tape will then begin moving in the left-to-right direction.) When this indicator illuminates steadily, it indicates that this tape deck is in the playback mode or the recording mode. When it flashes continually, this is an indication that this tape deck is in the pause mode or the recording stand-by mode.

#### 26 Stop button (■ STOP)

This button can be used to stop tape movement.

#### Indicators section

#### 27) Input level meter

During playback, this meter indicates the level of the recorded sound.

During recording, it indicates the level being recorded, adjusted by the recording-level control.

#### 28 Bias adjustment indicator (BIAS CAL.)

Indicates that the bias can now be adjusted.

#### 29 Level adjustment indicator (LEVEL CAL.)

Indicates that the recording level can now be adjusted.

#### 30 Monitor indicators (SOURCE, TAPE )

Each indicator illuminates to show which of the monitor was set by the monitor switch.

#### 3) Dolby noise-reduction indicators (B, C)

Each indicator illuminates to show the type of Dolby noisereduction system selected by pressing one of the Dolby noise-reduction buttons.

#### 32 Multiplex filter indicator (MPX)

Illuminates to indicate that the multiplex filter is set to "ON".

#### 33 APRS indicator (APRS)

Illuminates to indicate that the "APRS" is set to "on" in the recording stand-by mode.

## (I/NORMAL, II/CrO<sub>2</sub>, IV/METAL)

The type of tape being used will be automatically detected and the indicator will illuminate.

#### Memory-mode indicators (MEMORY REPEAT, MEMORY STOP)

Each indicator illuminates to show which of the memory modes was set by the memory-mode button.

#### 36 Tape/Linear counter

Indicates the amount of tape movement or elapsed time.

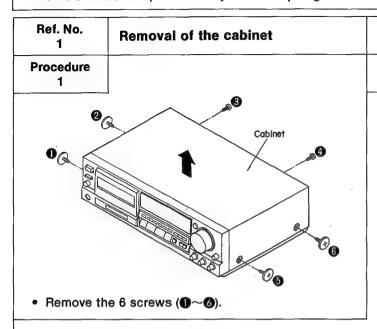

#### **DISASSEMBLY INSTRUCTIONS**

#### "ATTENTION SERVICER"

Some chassis components may have sharp edges. Be careful when disassembling and servicing.

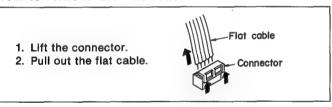

Ref. No.

2

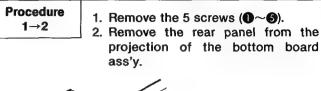

- 3. Remove the 6 screws (6~1).
- 4. Remove the 2 connectors (CP1, CP2).
- 5. Remove the 2 flat cables (CN2P, CN60).
- 6. Remove the main P.C.B. in the direction of arrow.

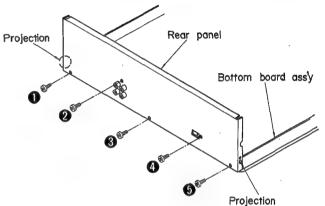

#### How to remove the flat cable

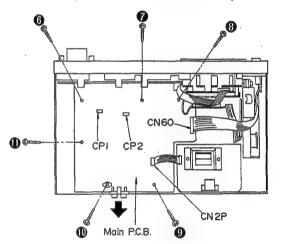

#### How to check the main P.C.B.

- When checking the soldered surfaces of main P.C.B. and replacing the parts, do as show.
- 1. Remove the 9 screws (1, 3, 5~1) in above figure.
- 2. Remove the 8 screws (P~P).
- 3. Remove the front panel ass'y in the direction of arrow ①.

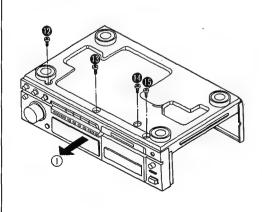

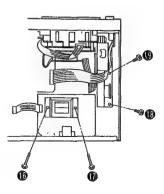

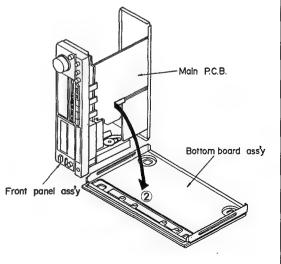

Removal of the main P.C.B.

- 4. Remove the bottom board ass'y in the direction of arrow ②.
- 5. Reinstall the front panel ass'y to the main P.C.B.

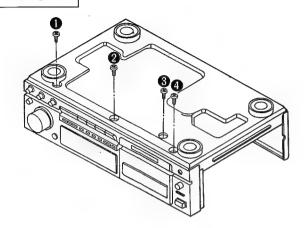

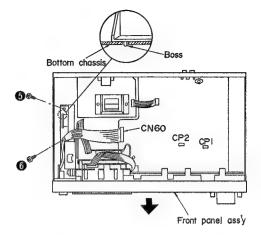

Ref. No. Removal of the front panel ass'y 3

**Procedure** 1→3

1. Remove the 6 screws ( $\mathbf{1} \sim \mathbf{6}$ ).

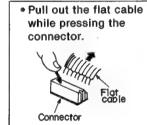

- 2. Remove the 2 connectors (CP1, CP2).
- 3. Remove the 1 flat cable (CN60).
- 4. Remove the boss from bottom chassis.
- 5. Remove the front panel ass'y in the direction of arrow.

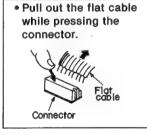

Ref. No. Removal of the FL drive P.C.B.

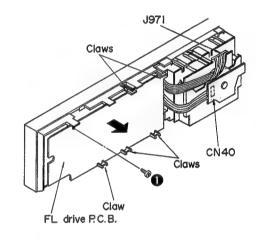

**Procedure** 1→3→4

Nut

- 3. Remove the 2 flat cables (CN40, J971).
- 4. Remove the 1 screw (1).
- 5. Release the 5 claws.
- 6. Remove the FL drive P.C.B. in the direction of arrow.

1. Pull out the rec level knob.

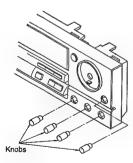

2. Remove the nut.

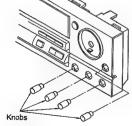

Rec level knob

Removal of the operation P.C.B.

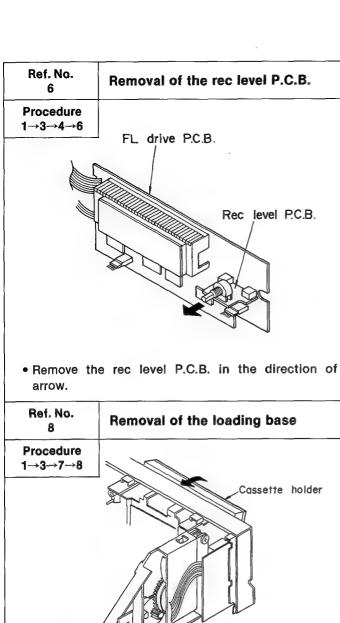

**Procedure** 1→3→4→5

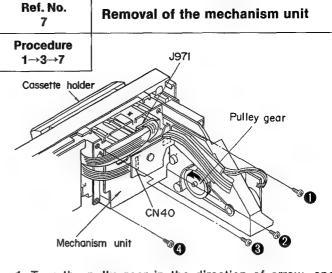

- Operation P.C.B.
- 2. Remove the 7 screws (1 ~7).
- 3. Remove the 9 claws.

1. Pull out the 4 knobs.

1. Turn the pully gear in the direction of arrow, and open the cassette holder.

Removal of the power switch/

- 2. Remove the 2 flat cables (CN40, J971).
- 3. Remove the 4 screws (1 ~4).

- 1. Release the 2 claws.
- 2. Remove the drive gear in the direction of arrow ①.

Ref. No. 20 Removal of the intermediate gear, leaf switch lever-A, leaf switch lever-B, and leaf switch lever-C

Procedure 1→3→7→8 →18→19→20

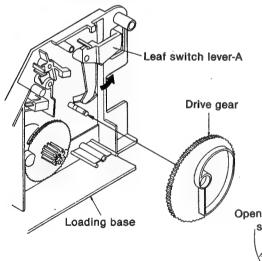

#### Removal of the intermediate gear

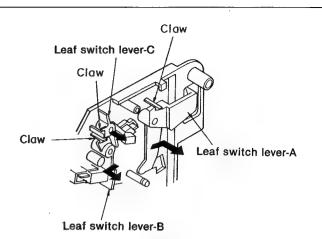

- 1. Release the 2 claws.
- 2. Remove the intermediate gear in the direction of arrow ①.

| Ref. No.<br>21  | Installation of the drive gear and drive sector lever |
|-----------------|---|
| Procedure<br>21 |   |

#### Installation of the drive gear

- Push the leaf switch lever A in the direction of arrow.
- 2. Place the drive gear as shown below and then install it in the loading base.

#### Removal of the leaf switch lever-A

· Release the 1 claw.

#### Removal of the leaf switch lever-B

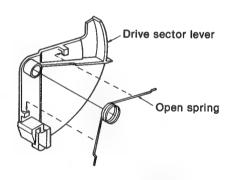

• Release the 1 claw.

#### Removal of the leaf switch lever-C

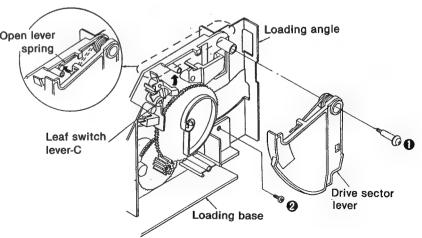

· Release the 1 claw.

#### Installation of the drive sector lever

 Temporarily install the open spring in the drive sector lever.

- 2. Install the loading angle in the loading base and then secure it with the 1 screw (2).
- Push the leaf switch lever C in the direction of arrow.
- 4. Secure the drive sector lever with 1 screw (1).
- Engage the open spring in the claw of the loading base.

#### ■ MEASUREMENT AND ADJUSTMENT METHODS

#### **Measurement Condition**

- Rec. level control: Maximum
- Timer switch; Off
- MPX filter switch; off
- · Calibration-bias control; Center
- Rec. balance control: Center

#### **Measuring instrument**

- EVM (Electronic Voltmeter)
- Oscilloscope
- Digital frequency counter
- AF oscillator

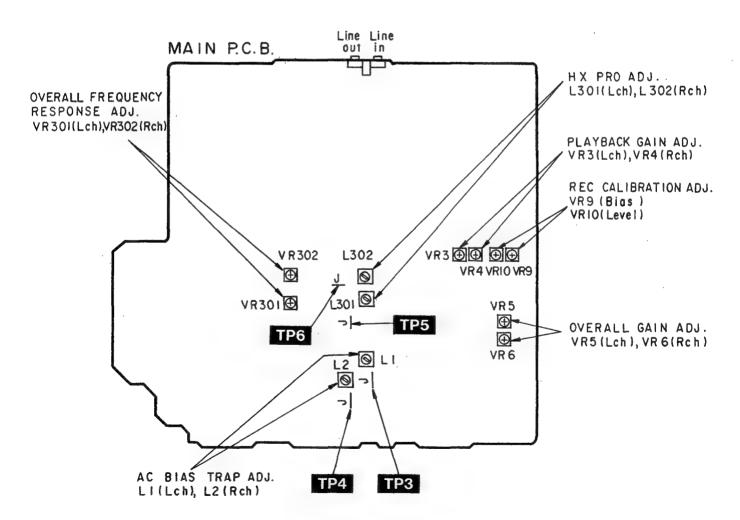

#### Test tape

- Head azimuth adjustment (8kHz. -20dB); QZZCFM
- Tape speed adjustment (3kHz, -10dB); QZZCWAT
- Playback frequency response (315 Hz, 12.5 kHz, 10 kHz, 8 kHz, 4 kHz, 1 kHz, 250 Hz, 125 Hz, 63 Hz, -20 dB); QZZCFM

- Calibration-level control: Center
- · Dolby NR switch; Off
- · Make sure heads are clean
- Make sure capstan and pressure roller are clean
- Judgeable room temperature 20±5°C (68±9°F)
- ATT (Attenuator)
- Resistor (600Ω)
- Playback gain adjustment (315Hz, 0dB); QZZCFM
- Overall frequency response, Overall gain adjustment

Normal reference blank tape; QZZCRA CrO<sub>2</sub> reference blank tape; QZZCRX Metal reference blank tape; QZZCRZ

#### Adjustment Points

#### **HEAD AZIMUTH ADJUSTMENT**

- Playback the azimuth adjusment portion (8 kHz, -20 dB) of the test tape (QZZCFM). Vary the azimuth adjusting screw until the output of the R-CH are maximized.
- 2.Perform the same adjustment in the play mode.
- After the adjustment, apply screwlock to the azimuth adjusting screw.

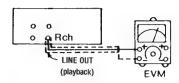

Fig.1

Fig.2

#### **PLAYBACK GAIN ADJUSTMENT**

- Playback the gain adjusted portion (315 Hz, 0 dB) of the test tape (QZZCFM).
- Adjust VR3 (L-CH) and VR4 (R-CH) so that the output is within the standard value.

Standard value: 0.4V±0.5dB

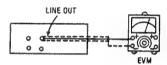

Fig. 3

#### PLAYBACK FREQUENCY RESPONSE

- Playback the frequency response portion (315 Hz, 12.5 kHz~63 Hz, -20 dB) of the test tape (QZZCFM).
- Assure that the frequency response is within the range shown in Fig. 5 for both L-CH and R-CH.

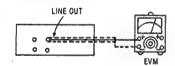

Fig. 4

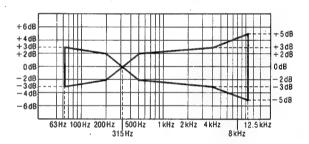

Fig. 5

#### **AC BIAS TRAP ADJUSTMENT**

- Insert the Metal blank test tape (QZZCRZ) and set the unit to the Record mode.
- Adjust L1 (L-CH) [[L2 (R-CH)]] so that the output voltage between TP3 (TP4) and GND is less than the minimum value.

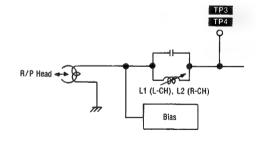

Fig. 6

#### **HX PRO ADJUSTMENT**

- 1. Insert the Metal blank tape (QZZCRZ) and set the unit to the Record Pause mode.
- Connect a DC voltmeter across TP5 (L-CH) and GND, TP6 (R-CH) and GND.
- Adjust L301 (L-CH) and L302 (R-CH)so that the output is the minimum value.

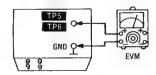

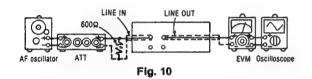

Fig. 7

#### OVERALL FREQUENCY RESPONSE

- 1. Insert the normal blank test tape (QZZCRA) and set the unit to the record pause mode.
- 2. Apply a reference input signal (1 kHz, -24 dB) through an attenuator.
- 3. Attenuate the signal by 20dB and adjust the frequency from 50 Hz~10 kHz.
- 4. Record the frequency sweep.
- 5. Playback the recorded signal and assure that it is within the range shown in Fig. 8 in comparison to the reference frequency (1 kHz).
- 6. If it is not within the standard range, adjust VR301 (L-CH) and VR302 (R-CH) so that the frequency level is within the standard range.
  - Level up in high frequency range ......Increase the bias current.
- Level down in high frequency range...Decrease the bias current.
- 7. Repeat steps 2~6 above using the CrO<sub>2</sub> tape (QZZCRX) and the metal tape (QZZCRZ) increasing the frequency range to 12.5kHz (50Hz~12.5kHz).
- 8. Assure that the level is within the range shown in Fig. 9.

#### Normal Overall frequency response chart (NR OUT) +4dB + 2 dR 0 dE 0 dB -2dB - 3 dB - 4 dF -6 dE 50Hz 100Hz 200Hz 500Hz 1kHz 2kHz

Fig. 8

#### CrO₂•Metal Overall frequency response chart (NR OUT)

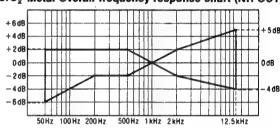

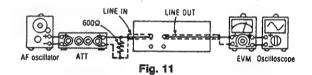

Fig. 9

#### **OVERALL GAIN ADJUSTMENT**

- 1. Insert the normal blank test tape (QZZCRA) and set the unit to the record pause mode.
- 2. Apply a reference input signal (1kHz, -24dB). Attenuate the output so that its level becomes 0.4V.
- 3. Record this input signal.
- 4. Playback the signal recorded in step 3 above, and assure that the output is within the standard value.
- 5. If it is not within the standard value, adjust VR5 (L-CH) and VR6 (R-CH).
- 6. Repeat the step 2~5 above until the output is within the standard value.

Standard value: 0.4 V ± 0.5 dB

#### **REC CAL. ADJUSTMENT**

- 1. After the overall frequency characteristics and over all gain are adjusted, insert the test tape (QZZCRA) in the unit and then set the recording mode (REC/PLAY).
- Level Adjustment -
- 2. First, press the REC CAL button. (The indication "LEVEL CAL" will appear in the FL meter.)
- 3. Adjust VR10 so that the level of the right and left channels reach the T mark as shown.
- Bias Adjustment –
- 4. Next, press the REC CAL button again. ("BIAS CAL" will be displayed in the FL meter.)
- 5. Adjust VR9 so that the indication of the left channel level reaches the x mark as shown.

)......Voltage values at record mode.

For measurement us EVM. Important safety notice

Components identified by A mark have special characteristics important for safety.

When replacing any of these components, use only manufacturer's specified parts

- ) indicates +B (bias).
- ---- ) indicates -B (bias).
- ) indicates the flow of the playback signal.
- ( ) indicates the flow of the record signal.
- The supply part number is described alone in the replacement parts list.

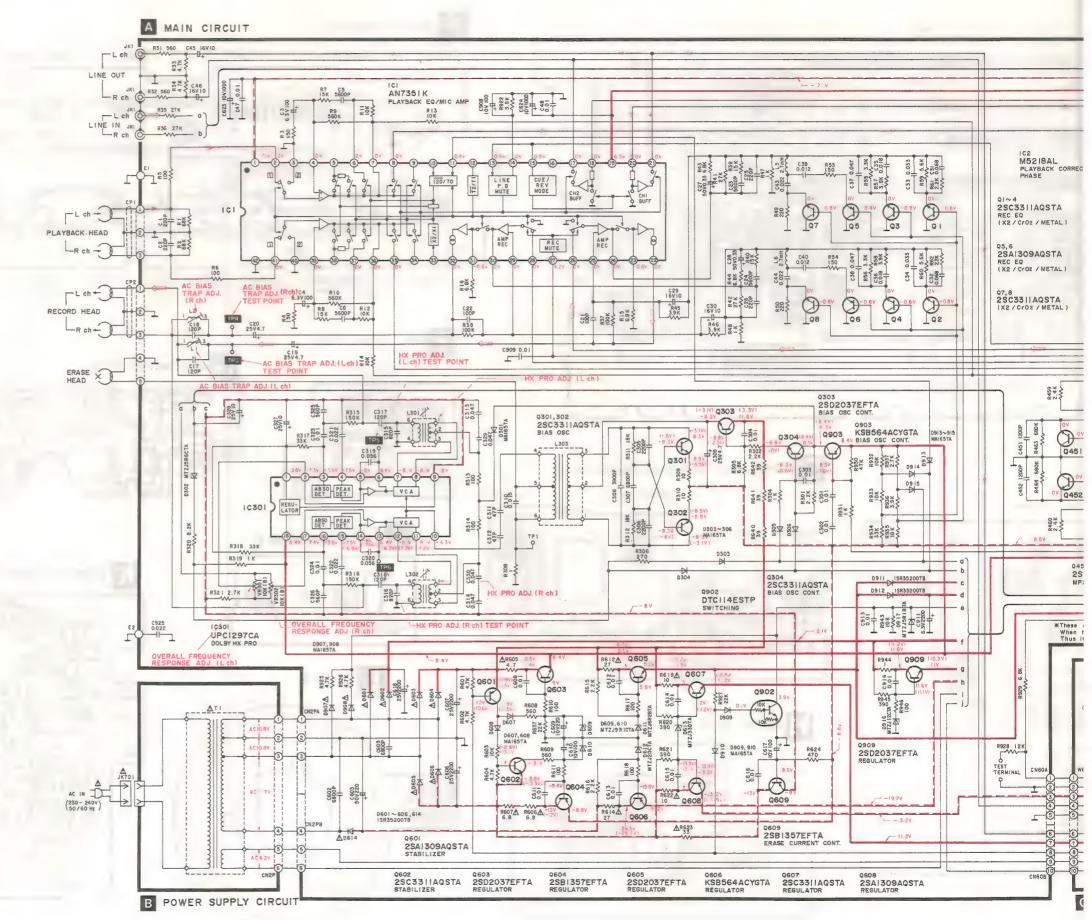

| Ref. No.                                | Production Part No. | Supply Part No. |
|---|---------------------|-----------------|
| IC2, 701, 702,<br>901, 902, 903,<br>906 | M5218AL             | M5218L          |
| IC203                                   | SN74LS74AMEL        | SN74LS74AM      |

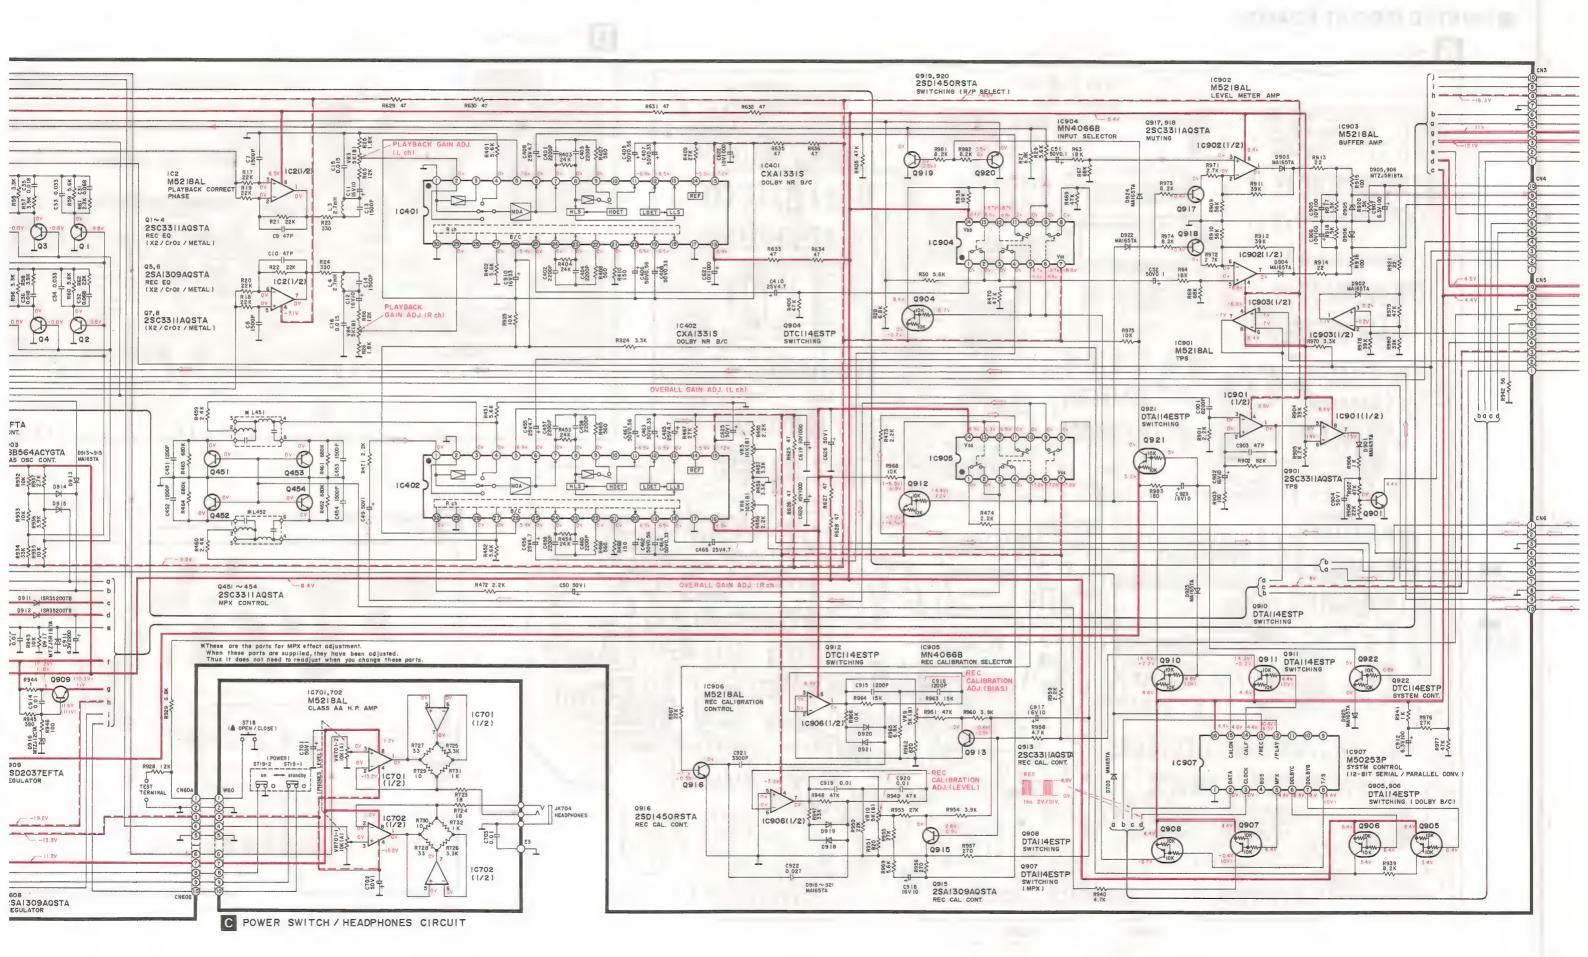

#### \* Caution!

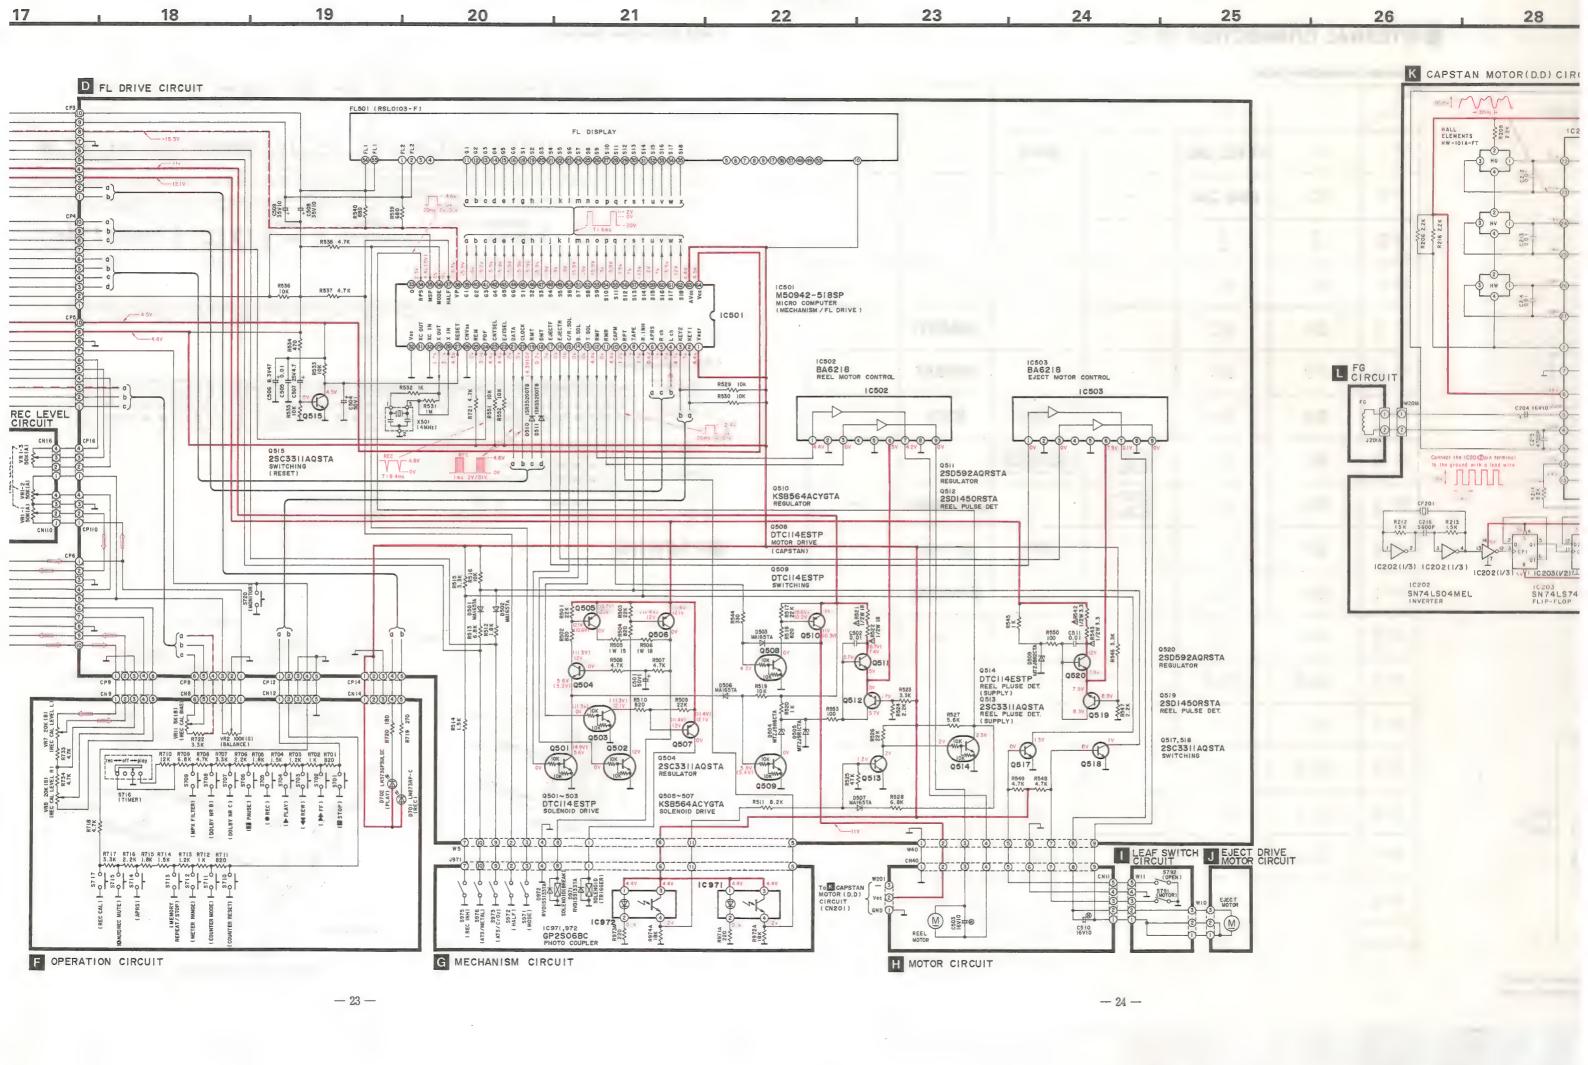

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

- \*Cover the parts boxes made of plastics with aluminum foil.
- \*Ground the soldering iron.
- \*Put a conductive mat on the work table.
- \*Do not touch the legs of IC or LSI with the fingers directly.

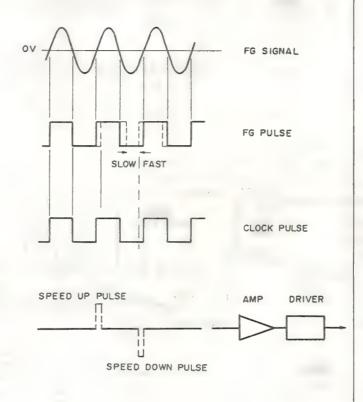

## TROUBLESHOOTING OF DIRECT DRIVE MOTOR

#### • OUTLINE OF THE DIRECT DRIVE MOTOR SYSTEM

The capstan motor is actuated by the DD motor digital servo system. The FG pulse is generated after the detection of the zero crosspoint, and the reference signal generated from the quartz oscillator is compared with this FG pulse. From this comparison, the accelerated and reduced speed pulses are generated, causing the driving coil to function.

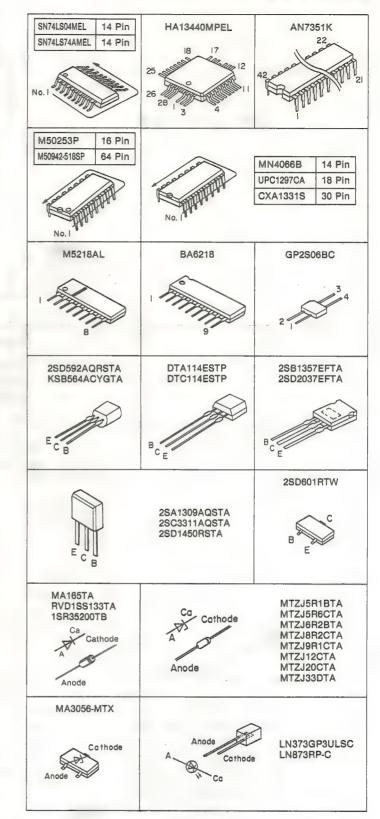

#### TROUBLESHOOTING OF DIRECT DRIVE MOTOR

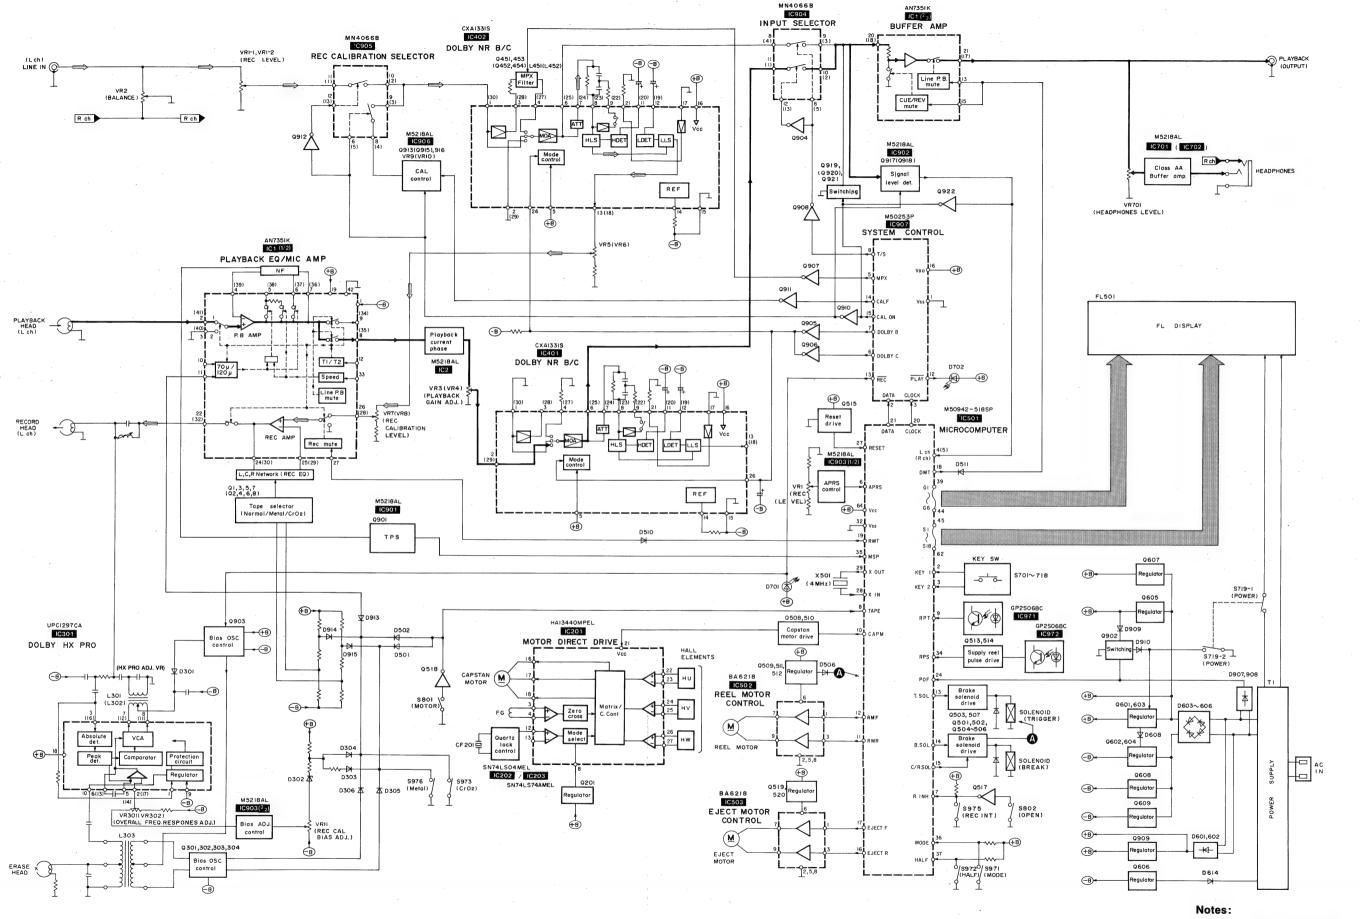

| Problem   | Possible Cause  | Check Points  |
|---|---|---|
| The motor does not rotate.  | No power supply (+12V).     The Hall element has failed (Current does not flow).     The ceramic (or crystal) does not oscillate. | Check the voltage applied to the connector.     Check the DC potential on IC201 pins ②~②.     *Check the waveform of IC201 pin ②.   |
| <ol> <li>The motor does not rotate<br/>properly. (When pressed,<br/>it stops at certain angles.<br/>Sometimes it does not<br/>rotate even if power is<br/>ON.)</li> </ol> | The coil is broken or not properly soldered.     Output of the Hall element is not proper.  | *Check the conductance of the coil. If normal, the resistances between IC201 pins (6~(7), (7~(8), (6~(8) will reach 20 ohms. • Check the waveform of IC201 pins (20~(7)). |
| 3. The motor is out of control.   | 1. The FG coil is broken.   | Check the waveform of IC201 pin ⑤.     Check if the FG coil is broken.  |
| 4. Abnormal wow.  | Same as those described for problem 2.  |   |

Note: Check the points marked with an asterisk (\*) by removing the DD motor control P.C.B. and then connecting IC201 pin ② to GND with a lead wire. (After the DD motor control P.C.B. is removed, current will start flowing through the coil, heating the IC.)

#### ■ REPLACEMENT PARTS LIST

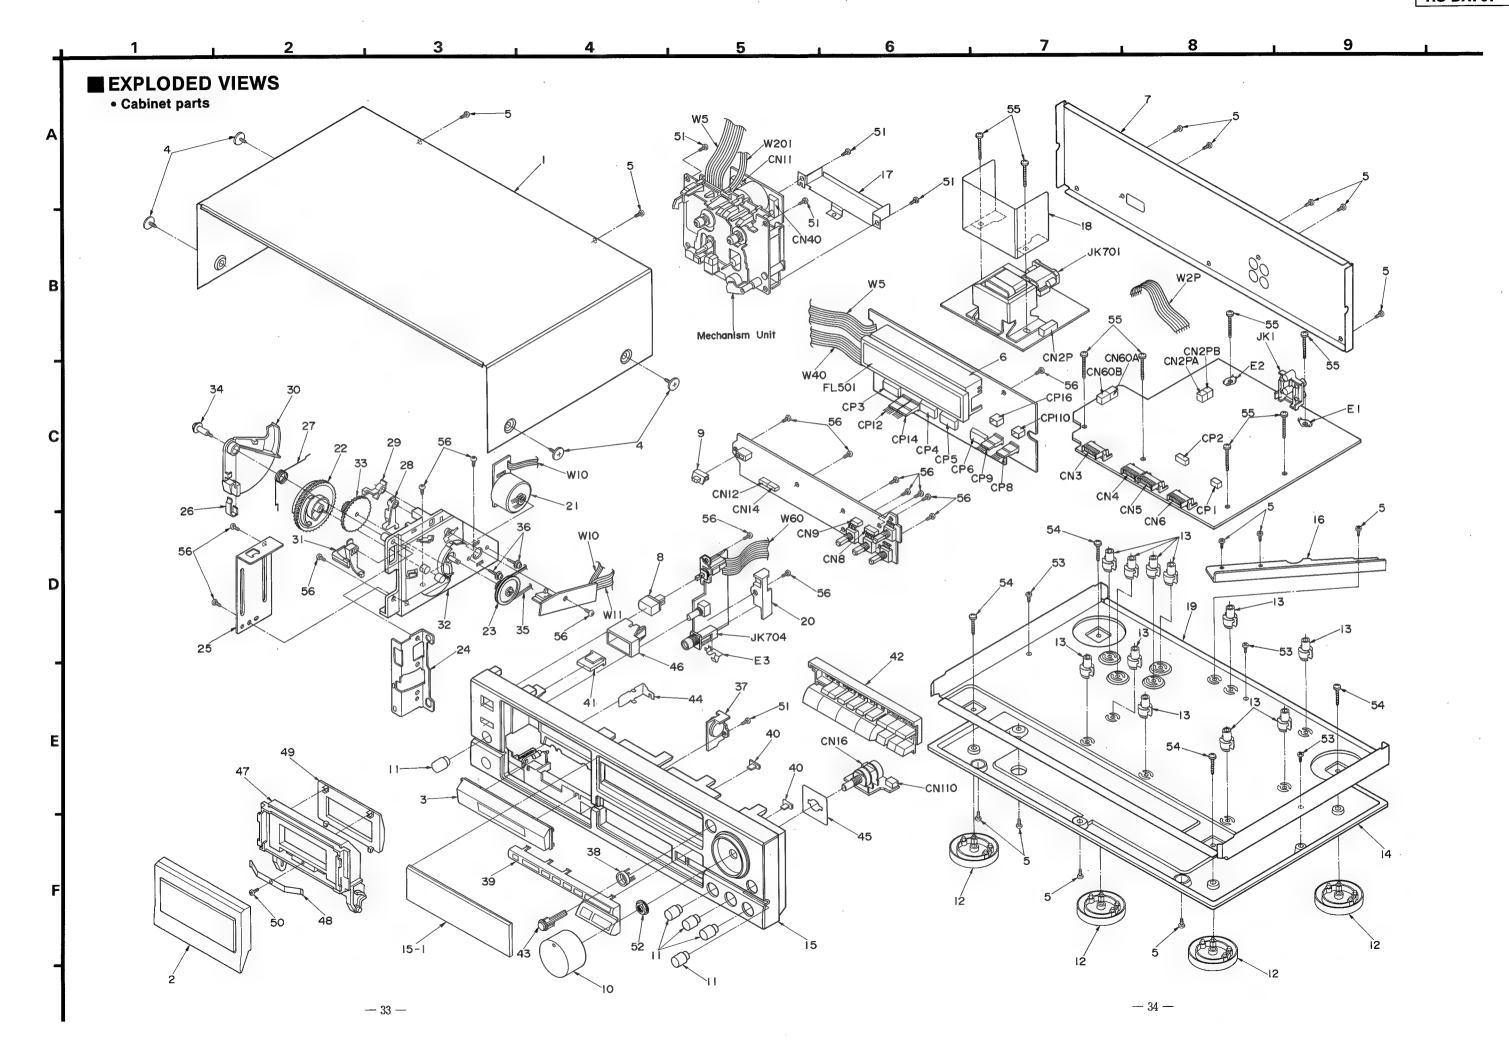

Notes: \* Important safety notice:

Components identified by △ mark have special characteristics important for safety. When replacing any of these components use only manufacturer's specified parts.

\* The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indications can be used for all areas.

#### **REPLACEMENT PARTS LIST**

Notes: \* Important safety notice:

Components identified by ∧ mark have special characteristics important for safety. When replacing any of these components use only manufacturer's specified parts.

\* The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indications can be used for all areas.
